

Sk. Md. Tashfin Sami

tashfinsami@gmail.com | +8801628778472
linkedin.com/in/tashfinsami | github.com/tashfinsami

Highly motivated and passionate computer science graduate with strong programming knowledge, problem solving experience and practical knowledge of AI integration. Published peer-reviewed IEEE research paper in applied machine learning. Eager to contribute to AI-driven software development in a collaborative environment.

Education

Bachelor of Science in Computer Science and Engineering *Jan 2020 – Dec 2025*
Patuakhali Science and Technology University, Patuakhali, Bangladesh

- CGPA: 3.25 / 4.00
- Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Software Engineering, Operating System, Computer Networks, Statistics, Machine Learning

Higher Secondary Certificate in Science *Jul 2017 – May 2019*
Khulna Collectorate Public School and College, Khulna, Bangladesh

- GPA: 5.00 / 5.00

Secondary School Certificate in Science *Jan 2015 – Mar 2017*
Khulna Zilla School, Khulna, Bangladesh

- GPA: 4.77 / 5.00

Technical Skills

- **Programming Languages:** C, C++, Java, Python, PHP, HTML, CSS, JavaScript
- **Databases:** MySQL
- **Problem Solving:** 250+ problems solved on *Codeforces*, *LeetCode* and *Virtual Judge*
- **AI Integration:** OpenAI API
- **Tools and Platforms:** Git, GitHub, XAMPP, Postman, Linux

Projects

Blood Donation Management System | *Java, Java Swing, MySQL, JDBC* *GitHub*

- Built a desktop application using OOP to structure the system into modular classes for donors, inventory and records management.
- Implemented full CRUD operations for donor management with search and filter functionality by blood group and location.
- Integrated MySQL database via JDBC for persistent storage and designed a user friendly GUI using Java Swing.

Medical Imaging Report Generation Pipeline | *Python, Qwen3, OpenAI API* *GitHub*

- Built a pipeline using prompt engineering techniques that converts mammogram images into structured diagnostic reports using a large language model (Qwen3 via OpenAI Chat Completions API).
- Implemented function calling to enforce structured output fields to enforce consistent report format and reduce hallucinations.
- Applied deterministic inference techniques including temperature scaling, nucleus sampling controls, and fixed seed configuration to ensure reproducible and clinically consistent report generation.
- Implemented evaluation of model performance by analysing consistency, output reliability and prediction quality against ground truth.

Project API | *PHP, MySQL, JWT, HTML* *GitHub*

- Built a REST API project demonstrating core concepts including token-based authentication, API key generation and request-response communication between client and server.
- Implemented security features including rate limiting, HTTP caching and JWT authentication to simulate real-world API security practices.
- Deployed and tested on a local Apache server via XAMPP, configuring `.htaccess` for URL rewriting and access control.

Research & Publications

Diffusion Augmented SkinVit-Net for Skin Cancer Diagnosis | Computer Vision, Generative AI Verify

- Published at the 28th IEEE International Conference on Computer and Information Technology (ICCIT), Cox’s Bazar, Bangladesh, December 2025.
- Addressed class imbalance in medical imaging by fine tuning a Stable Diffusion 1.5 model with LoRA to generate high quality synthetic dermoscopic images for underrepresented lesion classes.
- Proposed SkinVit-Net, a lightweight MobileNetV3-Transformer hybrid classifier achieving 93.52% accuracy on skin lesion classification, outperforming established baseline models.
- Evaluated model performance using standard image quality metrics and validated feasibility of training on resource-constrained hardware.

Awards & Scholarships

Ankur Undergraduate Research Scholarship 2025
Ankur International, Portland, USA
